

Flexible analysis and reporting to review health plan performance

Executive Summary

CUSTOM REPORTS

ATTRACTIVE PRESENTATION

EASY DISTRIBUTION

Every health plan needs to know utilization, trends and performance. Plan analysis and reporting can now be combined into one function to save time and resources.

Executive Summary is a comprehensive analysis and reporting tool available within the Benefit Informatics Data Analysis and Reporting service. This robust tool combines multiple functions into one routine to save both time and resources. By combining multiple functions, such as claims activity, plan performance, benchmarks and top 10 payees, diagnosis and procedures, Executive Summary provides a valuable, easy-to-use resource.

Quickly review and provide this plan information:

- Comprehensive claims analysis
- Healthcare utilization and trends
- Benchmark plan costs to regional/national standards

Executive Summary Capabilities:

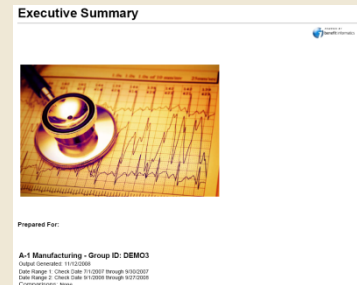

- Flexible analysis and reporting tool
- Multiple report selection
- Replace costly, time-consuming monthly reporting process
- Configurable design and output
- Customizable content (text, images, logo)
- Easy-to-use HTML editor
- Multiple presentation options – print, PDF, online distribution

**Implementation of Data Analysis and Reporting is a prerequisite for use of the Executive Summary.*

Transparency is transforming the healthcare industry. Benefit Informatics is at the forefront of transparency with proven data analysis and reporting services currently being utilized by payers administering more than 5,000 self-funded health plans covering more than 2 million plan participants.

Flexible Configuration–

Customize text, images, logo in an easy-to-use HTML editor

Attractive Presentation–

Present professionally designed report output

Distribution Options–

Provide to clients in print, PDF or online electronic versions
